

Dignity Tracker user guide

The Dignity Tracker at dignity-tracker.onrender.com is where Phoenix Dignity Project tracks care package requests, delivery volunteers, packing and Tempe Feed booth requests in one place. Screenshots use made-up sample people.

Getting started

Everyone signs in with their name or phone number and a PIN of at least 4 digits. There are two kinds of accounts.

Phoenix Dignity Project

Sign in

Volunteers and coordinators sign in with their phone number (or name) and PIN.

Phone number or name

PIN

Sign in

New volunteer? [Sign up here](#). Need a care package? [Request one](#).

Dignity belongs to everyone. · dignityphoenix.org

Account	What they can do
Volunteer	Claim deliveries on the map, sign up for packing shifts, log booth requests, see inventory
Coordinator	Everything a volunteer can, plus manage care packages, send messages, approve volunteers, download the Excel file and change settings

New volunteers sign up at dignity-tracker.onrender.com/join. Their account stays pending until a coordinator approves it on the **Volunteers** page.

Changing your PIN: click your name at the top right (**My account**).

The menu across the top:

- **Home:** your deliveries, your packing shifts, what's due at the next Tempe Feed, and items running low.
- **Delivery map:** open deliveries to pick from.
- **Packing:** packing shifts to sign up for.
- **Tempe Feed booth:** the booth request board.
- **Inventory:** what's on the shelf and the shopping list.
- **Care packages, Messages, Volunteers, Excel:** coordinators only.

The screenshot shows the Phoenix Dignity Project Dignity Tracker user interface. At the top is a blue navigation bar with the project name and links to Home, Delivery map, Packing, Tempe Feed booth, Inventory, Vic Volunteer, and Sign out. Below the navigation bar, the user is greeted as 'Hi Vic' with a hand icon. To the right of the greeting are three buttons: 'Pick a delivery' (green), 'Help pack' (white), and 'Tempe Feed booth' (white). Below the greeting, there are two summary boxes: a pink one showing '4 deliveries waiting for a volunteer' and a white one showing '3 booth items still to buy'. The main content area is divided into three columns. The left column, 'My deliveries', lists two items: 'CP-0004 · Dev Placeholder' and 'CP-0006 · Finn Fixture', both with 'Volunteer Assigned' status and pickup/delivery times. The middle column, 'My packing', states 'You're not signed up to pack. See packing shifts.' with a link. The right column, 'Tempe Feed, 2026-10-06', shows '3 item(s) still to buy · 2 bought and ready for the booth.' with a link to 'Open the booth board'. At the bottom, a footer message reads 'Dignity belongs to everyone. · dignityphoenix.org'.

People asking for help can also use the public request form at dignity-tracker.onrender.com/request. They don't need an account.

Care packages (coordinators)

Every request from the Google Form or the website appears on the **Care packages** page by itself. Nobody needs to import anything. Each request moves through these statuses:

1. **New**: just arrived.
2. **Texted - No Response**: you messaged them and are waiting to hear back.
3. **Too Early to Pack**: not ready yet, for example a delivery date weeks away.
4. **Ready for Volunteer**: confirmed, and now shown on the delivery map for volunteers to claim.
5. **Volunteer Assigned**: a volunteer has taken it.
6. **Packed & Ready**: the box is packed.
7. **Picked Up**: the volunteer has collected it and is on the way.
8. **Delivered**: done.

Changing a request from its row. Each row on the Care packages page has its own controls, and changes save the moment you make them:

- the **status** dropdown;
- the **Volunteer** dropdown (picking someone moves it to Volunteer Assigned; clearing it puts it back on the map);
- **Printed** and **Connected** tick boxes (label printed, WhatsApp group made);
- **Text** and **Label** buttons.

Search name, phone, zip, item...
Filter

☐	ID	STATUS	NAME	PHONE	ZIP	LANG	NEEDS	VOLUNTEER	PICKUP	PRINTED	CO
☐	CP-0007	New	Gia Example	480-555-0107	85034	English	Hygiene Items: High · Food: Medium	—	☐	☐	
☐	CP-0008	Texted - No Response	Hal Test	480-555-0108	85323	English	Hygiene Items: High · Food: Medium	—	☐	☐	
☐	CP-0001	Ready for Volunteer	Ana Demo	480-555-0101	85031	English	Hygiene Items: High · Food: Medium	—	☐	☐	
☐	CP-0002	Ready for Volunteer	Ben Sample	480-555-0102	85339	English	Hygiene Items: High · Food: Medium	—	☐	☐	

Changing many at once. Tick the boxes at the left of several rows. A bar appears at the bottom of the screen to change all of them together.

Opening a request (click its ID) shows everything they asked for, the packing list, every Google Form answer and the **Edit** box for names, phones, addresses and notes.

Not on the map yet? The site places addresses on the map by itself. If one won't place, check the address has a street number, city and zip, then press **Place addresses on the map**.

Delivery map (volunteers)

The **Delivery map** shows every delivery waiting for a volunteer as a numbered pin, with the same numbers in the list beside it. Before you claim one, you only see the street and zip; the house number and phone appear once it's yours.

The screenshot shows the 'Phoenix Dignity Project' web application. The top navigation bar includes links for Home, Delivery map (active), Packing, Tempe Feed booth, Inventory, Vic Volunteer, and Sign out. The main heading is 'Delivery map'. Below it, a message says 'Pick a numbered delivery you can do. Exact addresses and phone numbers show once it's yours.' and a 'Print' button is visible. On the left, a list of three deliveries is shown:

- 1 E Test Ave, Phoenix, AZ 85020**
CP-0004 · Dev · household of 4
Ready for Volunteer
No alcohol, No aerosol
I'll deliver this
- 2 W Demo Dr, Phoenix, AZ 85031**
CP-0001 · Ana · household of 1
Ready for Volunteer
I'll deliver this
- 3 N Mock Ave, Phoenix, AZ 85033**
CP-0005 · Eva · household of 1 · Español
Ready for Volunteer
Peanuts
I'll deliver this

On the right, a map displays five numbered pins (1, 2, 3, 4, 5) corresponding to the delivery list. Pin 1 is purple, pin 2 is pink, pin 3 is green, pin 4 is purple, and pin 5 is blue. A zoom control (+/-) is located above the map.

1. Pick a numbered delivery you can do and press **I'll deliver this**.
2. Say when you can pick it up from HQ and when you'll deliver, then press **Claim delivery**.
3. It now shows on your **Home** page under My deliveries, with the full address and a **Directions** link.
4. When you collect the box, open the delivery and press **I picked it up**.
5. After dropping it off, press **Mark delivered**.

Can't do it after all? Press **I can't do this one** on the delivery page. It goes back on the map for someone else.

Coordinators can press **Share list to WhatsApp** on the map to post this week's open deliveries to the volunteer group.

Packing and inventory

Packing shifts. On the **Packing** page, pick a shift, tick the packages you'll pack and press **Sign me up**. Press **I can't make it** to drop out. Coordinators add shifts at the bottom of the same page (date, time, place, number of spots).

The screenshot shows the 'Phoenix Dignity Project' website's 'Packing shifts' page. The top navigation bar includes links for Home, Delivery map, Packing (which is highlighted), Tempe Feed booth, Inventory, Vic Volunteer, and Sign out. The main heading is 'Packing shifts', followed by a subtext: 'Come help pack care packages at HQ. Sign up for a time and tick the packages you'll pack, so nobody packs the same one twice.' Below this, a specific shift is listed for 'Saturday, Oct 10' from '10:00-12:00 at HQ', with '0/4 signed up' and a note to 'Park on the street please'. A link to 'Choose packages to pack (6 waiting)' is provided, along with a prominent 'Sign me up' button. At the bottom of the page, a footer states 'Dignity belongs to everyone.' with a link to 'dignityphoenix.org'.

Packing a box. Open the package. Its **Packing list** shows each item to pack, already matched to what's on the shelf. Items that aren't safe for that person are flagged in red, for example aerosols or alcohol for a sober-living home, or a food allergy. Tick what you packed and press **Mark packed**. Those items come off the inventory count once, and the package moves to Packed & Ready.

Inventory. The **Inventory** page shows what's on the shelf and a **Shopping list** of what the open requests need but you don't have enough of. Anything below its low level also shows there. Coordinators update counts and add new items on the same page.

Inventory

Shopping list

What open requests need minus what's on the shelf. Items that clash with someone's restrictions aren't counted.

ITEM	REQUESTED	ON HAND	BUY
Rice	4	0	4
Beans	2	0	2
Shampoo	2	0	2
Snacks	2	0	2
Toothpaste	2	0	2
Canned meat not tracked	1	0	?
Canned vegetables	1	0	1
Cereal	1	0	1
Deodorant	1	0	1
Diapers	1	0	1
Laundry soap	1	0	1
Pads	1	0	1

Tempe Feed booth

Tempe Feed happens every Tuesday. When someone at the booth asks for something (shoes, a jacket, a backpack), log it on the **Tempe Feed booth** page under **New request at the booth**: their name, phone and each item with its size. The site records the date you entered it. Press **+ another item** for more than one.

Each item is a card on the board, and moves across these columns:

1. **Requested**: someone needs to buy it.
2. **Bought**: pressing **Bought** → also drafts a text telling the person it's coming.
3. **At Booth**: it's on the table at Tempe Feed, waiting to be collected.
4. **Picked Up**: the person took it home.

Press the **← button** on a card to move it back a step if it was moved by mistake. Press **×** to cancel an item, and **← Restore** to bring a cancelled one back.

The 5-week hold. Items are held for 5 weeks after the request. Cards at the booth show **Week 1 of 5, Week 2 of 5** and so on. After 5 weeks the card turns red with **Over 5 weeks, cancel?**, and a box at the top of the page lists every overdue item with a **Cancel it** button. Nothing is cancelled automatically, so a coordinator or volunteer decides.

Many people at once. Several volunteers can log requests at the same time during the event; nothing gets lost. The board picks up everyone else's changes every 10 seconds. If you're in the middle of typing a request, it waits and shows a **Refresh** notice instead, so your typing isn't lost.

The board shows every open item. To see only the requests entered on one day, pick it from the **Requested on** dropdown at the top.

Messages (coordinators)

The site never sends a message by itself. It writes the message for you, and you send it from your own phone.

Drafted for you when:

- a volunteer is assigned (an introduction to the requester naming the volunteer and the address);
- a volunteer picks up the box ("on the way");
- a package is delivered (a thank-you);
- a booth item is bought ("it's ready at Tempe Feed").

Spanish speakers get the Spanish version automatically.

Sending them. Open **Messages**. It has two tabs, **Care packages** and **Tempe Feed booth**. Press **WhatsApp** or **Text** to open your phone's app with the message filled in, send it, then press **Mark sent** (or **Mark skipped** if you didn't need it). **Show all** brings back ones already handled.

Hi Dev! Connecting you here to Vic Volunteer who will be delivering your package :-). They will be delivering to: 1400 E Test Ave, Phoenix, AZ 85020

WhatsApp Text **Mark sent** Mark skipped

Dignity belongs to everyone. · dignityphoenix.org

You can also message someone at any time from their request page (the **Coordinate** box) or the **Text** button on their row or booth card. The message there always matches where their request stands.

Changing the wording. Go to **Excel**, scroll to **Settings**, edit any message starting with "msg" and press **Save settings**. Words in curly brackets like {name}, {volunteer} and {address} are filled in for each person, so keep them.

Google Form and Excel

The Google Sheet behind the care package form and the website keep each other up to date every 5 minutes, and right away when someone submits the form. You can work in either one.

Change made in	Goes to	What travels
Google Form	Website	Every new request
Google Sheet	Website	Edited answers (address, items, name, phone) and the Tracker Status, Volunteer, Pickup and Delivered columns
Website	Google Sheet	Status, volunteer, pickup and delivery in the Tracker columns; name, phone and address edits; requests made on the website form

In the sheet: don't rename the columns that start with "Tracker". To see a change on the site straight away, use the **Tracker** menu, **Sync now**.

The Excel file. Everything on the site is kept in one Excel workbook. Coordinators can download it from the **Excel** page at any time, as a backup or for reports. If you edit the downloaded file, upload it on the same page to replace the site's copy. Only do this when nobody else is making changes, because the upload replaces everything.

Coordinator tasks and common questions

Volunteers page. Press **Approve** for new sign-ups. You can also make someone a coordinator, switch a volunteer off when they stop helping, set a new PIN for someone who forgot theirs, or add a volunteer yourself.

Someone forgot their PIN. A coordinator sets a new one on the Volunteers page and tells them.

A request is missing from the site. Open the Google Sheet and use **Tracker, Sync now**. The site checks the sheet every 5 minutes anyway.

I changed something in the sheet and the site didn't update. Run **Sync now**, then refresh the website page. If it still hasn't changed, tell Harini.

Someone's details are private. Volunteers only see a requester's full address and phone after they claim the delivery. Please don't share the Excel file or screenshots of request pages outside the team.
